REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Referring to claims 1, 2, 8, 9, 11, 12, 14-16, 18, 19, 25, 26, 28, 29, 31-33, 35, the prior art does not teach or fairly suggest "business continuance volume" features, as understood in the art and argued by Applicant, in conjunction with a statement of common ownership to EMC reference teaching "business continuance volume", e.g., US 6067199, in view of the scope and context of claims 1, 18, 35.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Amendment

2. The affidavit filed on 9 April 2007 under 37 CFR 1.131 has been considered but is ineffective in establishing, at least, due diligence. The affidavit indicates that both Lecrone and Pocock are inventors (1), but only indicates Lecrone as having produced the invention (4, 5). The affidavit indicates "they" developed source code as early as May 20, 1996 (3), however Pocock did not begin employment with EMC until August 1997. The affidavit indicates that Pocock worked "substantially" continuously since August 1997 (9), however the critical date of the McBrearty patent is June 13, 1997 (2). In addition to this, Exhibit A of the affidavit contains large gaps in time that, even without the backing factual evidence, does not corroborate Applicant's position of "substantially"

continuous work. Finally, Applicant still has yet to provide the factual evidence that would corroborate any such "substantially continuous" work.
